MANURE LIQUEFIER

Roebic Manure Liquefier is intended for use in hog, dairy and beef cattle operations including barns, confinement areas, and feed-lots. Specific applications include manure pits, slotted floor areas, and any piping, drains, traps, pumps, or equipment associated with handling, moving or storing livestock manure. Available in 1 and 5 gallon sizes.

RML 1

RML 5

Roebic RML Features:

- Digests manure solids
- Reduces ammonia and sulfide odors
- Non-pathogenic bacteria
- Improves manure liquidity
- Retains nutrient values
- 100% safe around humans and livestock
- 100% safe for the environment
- Bio-degradable

Roebic RML Benefits:

- More efficient action in manure pits and wastewater lagoons
- Easier breathing for livestock and employees
- Maintains a more liquid condition in pits and wastewater lagoons
- Lowers fertilizer costs
- No health concerns
- No pollution concerns
- Less stress on livestock
